OBJECTIVE

To develop myself more and more, I need a job in my field. because I am a fresh graduate, I am looking forward to making something great and I hope to do that with your company.

EDUCATION

Engineer's degree | AL Baath University

2014 – 2019

5 years of Computer Science and software engineering, I gained a lot of knowledge and skills.

EXPERIENCE

I have been taking a deep look into software design, software coding, database design, software development approaches, which I have learned from my studies and my experience with Azure cloud platform for 1 year, I have developed, and deployed my graduate project on it.

[Here](#) where **SopropI** (my graduate project) lives, and [here](#) where it published (I still working on it).

I am working on **Maktub** project nowadays which is based on Microservices Architecture, Layered approach, SOLID principles, Design Patterns and other best practices, and I use DevOps, Kubernetes, and Containerized application to implement that.

[Here](#) where **Maktub** lives.

SKILLS

- ASP.NET and ASP.NET Core
- C#
- Angular 5+
- Developing algorithms
- OO Programming
- SQL
- JavaScript and Typescript
- Rest API
- Problem Solving
- Functional Programming
- DB Design
- Docker

ACTIVITIES

Because of my studies, my activities focused on developing myself in algorithms, mathematics, and other aspects of computer science, but I have been working on developing myself since last year to build great programs that work on Cloud Platforms and used everything I learned in them.
